

WK 640

Art.no. 82

Characteristics

The WK640 is easy to propel through the water thanks to its streamlined design. The stability of the kayak is extra increased, here you can feel completely safe and just enjoy a relaxed paddling. The WK640 is equipped with rudder, lock/tow eye, double paddle mounts for self-rescue with float and three watertight compartments, one of which is between the paddlers, Good space between the people gives extra packing space. The new original pedal system is easily changed while sitting in the kayak, it gives the foot good support. They are mounted more centrally than on normal sea kayaks, which means that you get your knees up and can disconnect your hips and be more free in paddling.

Specifications

Length 640cm
